EDUCATION

Columbia University New York, NY | Dec 2026
M.S. in Data Science; GPA 3.80/4.00

University of Illinois Urbana-Champaign Champaign, IL | May 2025
B.S. in Econometrics & Quantitative Economics, Statistics minor; GPA 3.86/4.00, Highest Honors

PROFESSIONAL EXPERIENCE

Intrinio | *Data Analytics Consultant, Columbia* New York, NY | Sep 2026 - Present

- Identified **recoverable revenue** from B2B SaaS accounts that missed standard annual price uplifts by reconciling HubSpot CRM, Maxio billing and contract data, separating true misses from contractual exceptions
- Built account-level **ROI cases for price-uplift deals** that the team used in direct outreach to target customers
- Modeled renewal likelihood (XGBoost classifier, 0.81 out-of-sample AUC) and price response to inform revenue forecasts
- Prioritized accounts by value and churn risk, routing low-risk renewals to standard pricing and complex contracts to review
- Delivered Streamlit/Power BI decision tools used cross-functionally by Sales and Customer Success; translated market research, competitive analysis and pricing scenarios into recommendations presented **to the CEO**

Tarte Cosmetics | *Compliance Intern, Risk Analytics* New York, NY | Oct 2025 - May 2026

- Implemented a Python/SQL risk-scoring, human-in-the-loop triage workflow across 7 legacy systems; tuning thresholds on reviewer outcomes (precision@K, lift) **cut low-yield alerts 25%** while keeping every material exception in the top tier
- Traced **~40% of audit delays** to 12 recurring control breakdowns via root-cause analysis and prioritized process fixes
- Launched Power BI monitoring of exception volume, review aging and vendor patterns, helping cut repeat issues **22%**

Donglai Natural BioTech | *Data Scientist Intern, Commercial Analytics* Champaign, IL | Jun 2024 - Sep 2024

- Built a weekly marketing mix model across 5+ channels to measure marketing ROI and identify budget reallocations projected to increase incremental contribution by ~10%
- Estimated price and promotion elasticity for 50+ SKUs and designed 3+ A/B tests (power/MDE, guardrails) that supported customer-facing changes with mid-single-digit relative conversion lifts
- Segmented 10K+ customers (RFM) and predicted repeat-purchase propensity (0.78 ROC-AUC) to target retention efforts
- Automated invoice and PO review with a LangChain document-extraction pipeline, anomaly scoring and dbt/SQL checks, cutting daily finance review time **~30%**

Zheshang Securities | *Data Analyst Intern* Hangzhou, China | May 2023 - Sep 2023

- Standardized SQL/Python reconciliation of 50K+ portfolio records across 15+ fields, cutting manual review **~70%**
- Produced Excel/VBA scenario models for 10+ quarterly investment reviews covering 20+ private equity deals

PRODUCT & AI PROJECTS

SponsorScope | *Independent Product Builder* | Live demo | Case Study 2026

- Shipped a **free public web app** that screens single job postings or bulk-scans 76 company job boards for sponsorship, experience and pay fit, with Sheets-ready exports
- Reframed the product after user research on 36 job-seeker posts: 10 described visa blocks in final rounds or after offers, so the goal became cutting the cost of screening many jobs, not applying to fewer
- Integrated Greenhouse, Lever and Ashby APIs with 529K+ DOL H-1B filings using AI-assisted development (Claude Code); chose an explainable rules engine over runtime LLM calls for cost and auditability
- Curated 566 labeled job-description sentences from 140 companies for QA; blind-tested on 324 sentences from 77 unseen companies and refined rules based on error analysis
- Discovered only 10 of 137 analyst postings disclose sponsorship policy, so designed an evidence-backed Apply / Ask First / Skip decision workflow with filing-history signals to handle uncertainty

MultiDocRAG | *Columbia Applied AI Project* | GitHub | Report 2025 - 2026

- Engineered a RAG assistant that answers questions across multiple PDFs with cited sources and declines when evidence is missing; raised grounded-answer accuracy **from 62% to 87%** on 27 test questions (LangChain, FAISS)

SKILLS

Strategy: GTM strategy, revenue operations, pricing, competitive analysis, customer segmentation, ROI cases
Product & AI: requirements gathering, workflow automation, API integration, QA testing, AI evaluation, LLM/RAG
Analytics: SQL, Python (scikit-learn, XGBoost, PyTorch, Sentence-Transformers), A/B testing, Excel, Google Sheets
Tools: PowerPoint, Power BI, Tableau, Streamlit, dbt, Git, LangChain, FAISS, CRM data (HubSpot, Salesforce)
